PROJECT OVERVIEW

The Garage Management System is a web-based tool designed to manage and track all garage operations. The system aims to provide a centralized platform for garage owners to monitor and control their business activities, including employee management, inventory tracking, and customer service .

The system is built on the Salesforce platform, which provides a robust and secure infrastructure for managing and storing data. The Salesforce platform also offers a wide range of tools and features that can be used to customize and extend the system to meet the specific needs of the garage business.

One of the key features of the Garage Management System is its employee management module. This module allows garage owners to keep track of all their employees, including their contact information, work schedules, and job assignments. The system also provides tools for managing employee performance, such as tracking attendance and evaluating performance.

The Garage Management System also includes a customer service module, which allows garage owners to keep track of all their customers and their interactions with the garage. The system provides tools for managing customer information, such as contact details and service history, as well as tools for scheduling appointments and tracking customer feedback.

OBJECTIVES

Business Goals

- Optimize Garage Operations and Customer Experience
- Drive Revenue Growth and Efficient Resource Utilization
- Enable Data-Driven Decisions

Specific Outcomes

- Enhanced Data Accessibility
- Automated Scheduling and Service Tracking
- Inventory and Billing Automation
- Upsell and Cross-sell Recommendations
- Performance Analytics and Customer Retention

SALESFORCE KEY FEATURES AND CONCEPTS UTILIZED

INTRODUCTION

1. Creating Developer Account
2. Creating the Objects
3. Create the tabs
4. Create the lighting app
5. Create the Fields
6. Validation Rules
7. Duplicate Rules
8. Profiles
9. Role & Role Hierarchy
10. Users
11. Public Groups
12. Share Settings
13. Flows
14. Apex Trigger
15. Reports
16. DashBoard

DETAILED STEPS TO SOLUTION DESIGN

INTRODUCTION

The Garage Management System is a comprehensive solution designed to optimize the usage of vehicles and trailers that carry inventories to stores. The system aims to streamline the management of vehicle records, track vehicles, and ensure efficient inventory transportation. The Garage Management System will be built on the Salesforce platform, leveraging its robust architecture and scalability. The system will consist of several components, including vehicle records, inventory management, workflow automation, and integration with other Salesforce modules. The implementation strategy will involve requirements gathering, design, development, testing, and deployment. The abstraction framework for the system will use an Integration Procedure to get input from a workflow, query the product model based on that input, and update products, attributes, and inventory levels. The Garage Management System will provide a flexible and scalable architecture for managing and optimizing inventory transportation, ensuring efficient vehicle utilization, and automating business processes.

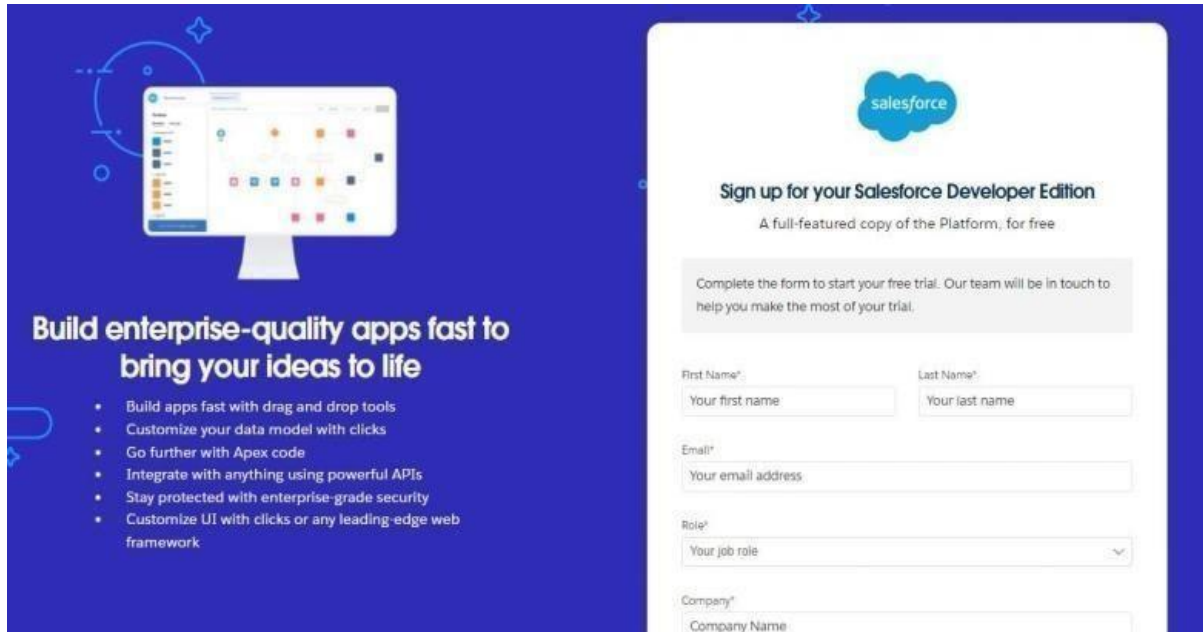

TASK 1: Creating Developer Account:

[Creating a developer org in salesforce.](#)

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details :
3. First name & Last name
4. Email
5. Role : Developer
6. Company : College Name
7. Country : India
8. Postal Code : pin code
9. Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in the format :
username@organization.com

10. Click on sign me up after filling these.

Build enterprise-quality apps fast to bring your ideas to life

- Build apps fast with drag and drop tools
- Customize your data model with clicks
- Go further with Apex code
- Integrate with anything using powerful APIs
- Stay protected with enterprise-grade security
- Customize UI with clicks or any leading-edge web framework

Sign up for your Salesforce Developer Edition

A full-featured copy of the Platform, for free

Complete the form to start your free trial. Our team will be in touch to help you make the most of your trial.

First Name* Your first name

Last Name* Your last name

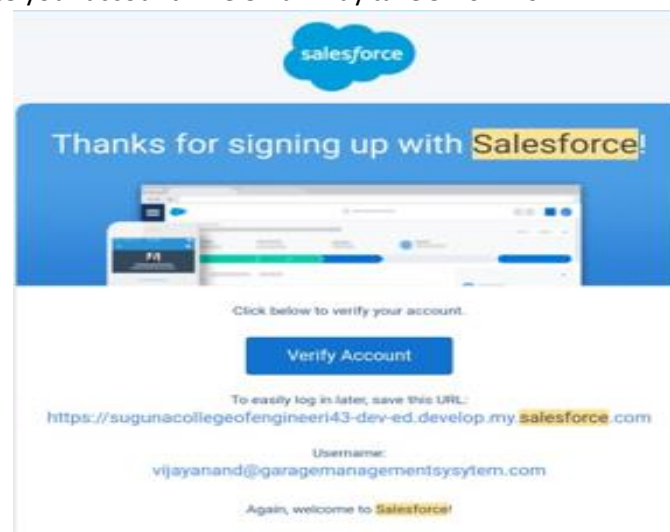

Email* Your email address

Role* Your job role

Company* Company Name

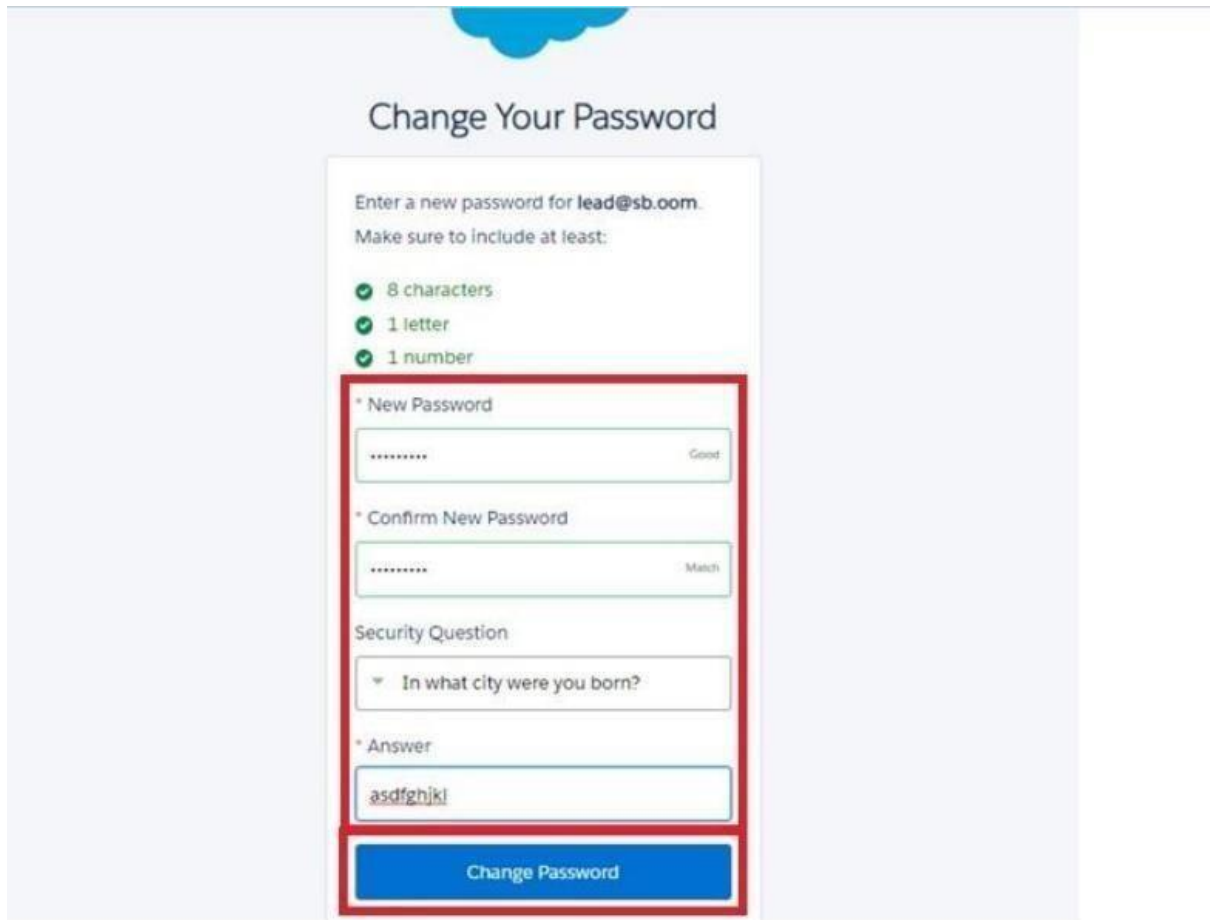

Account Activation

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

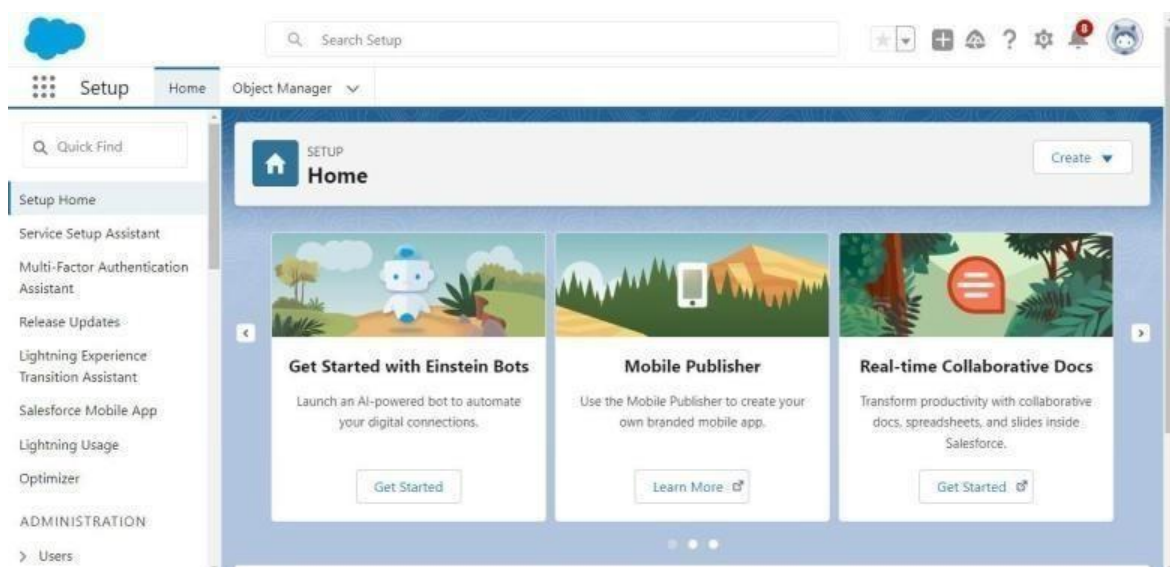

2. Click on Verify Account

3. Give a password and answer a security question and click on change password.

4. Then you will redirect to your salesforce setup page.

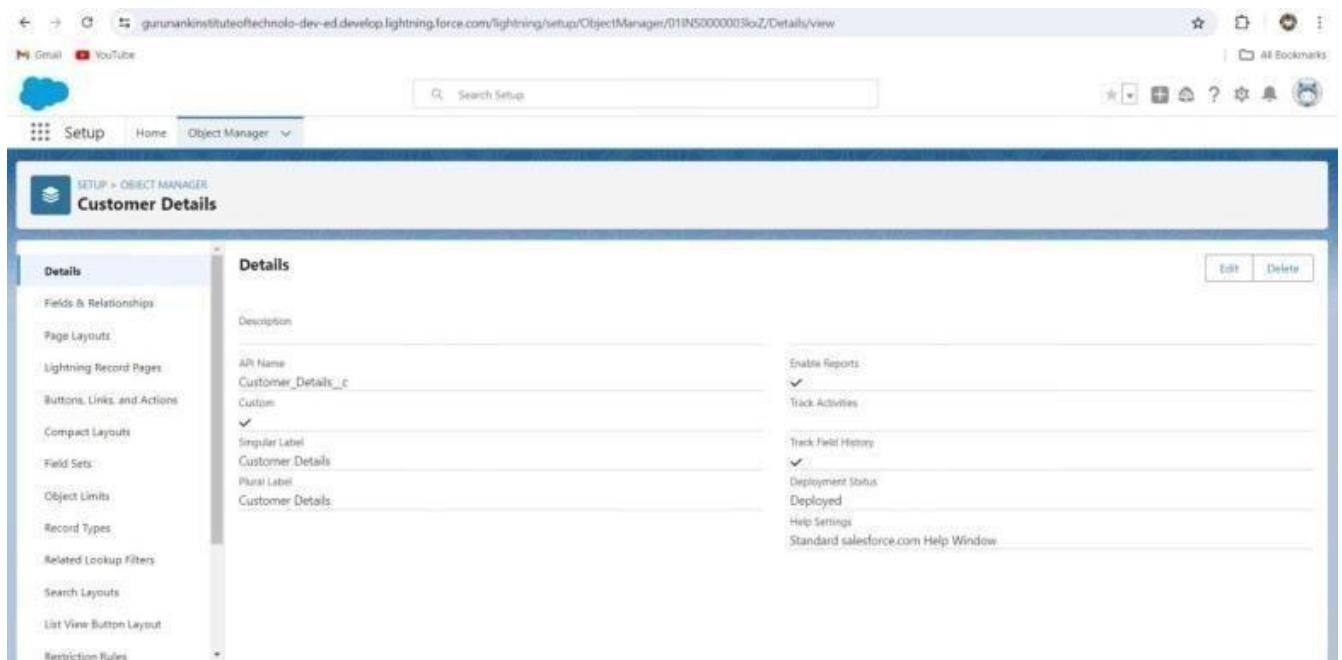

TASK 2: CREATING THE OBJECTS

i) Create Customer Details ObjectTo

create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
1. Enter the label name >> Customer Details
2. Plural label name >> Customer Details
3. Enter Record Name Label and Format
 - Record Name >> Customer Name
 - Data Type >> Text
2. Click on Allow reports and Track Field History,
3. Allow search >> Save

ii) Create Appointment ObjectTo

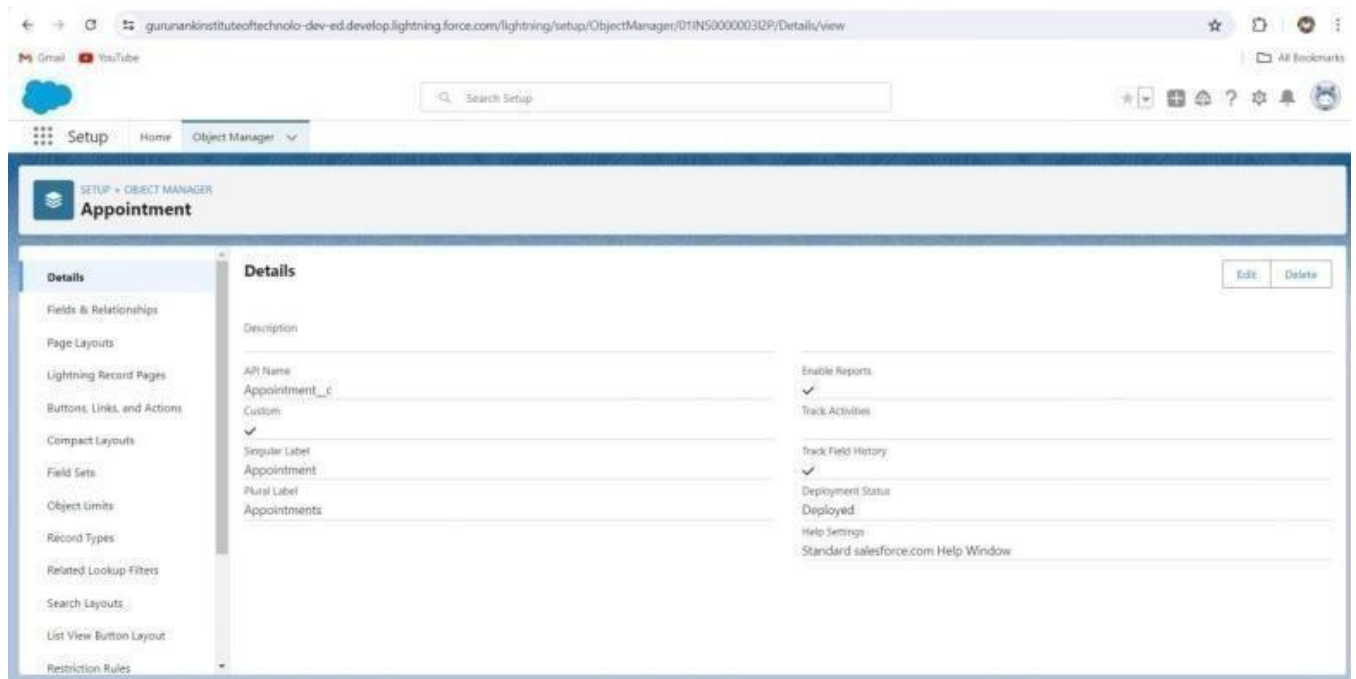

create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
1. Enter the label name >> Appointment
2. Plural label name >> Appointments
3. Enter Record Name Label and Format
 - Record Name >> Appointment Name
 - Data Type >> Auto Number

- Display Format >> app-{000}
- Starting number >> 1

2. Click on Allow reports and Track Field History, 3. Allow search

>> Save.

iii) Create Service Records ObjectTo

Create an Object:

1. From the the setup page >> Click on Object Manager >> Click on Create >> Click on CustomObject.

1. Enter the label name >> Service records

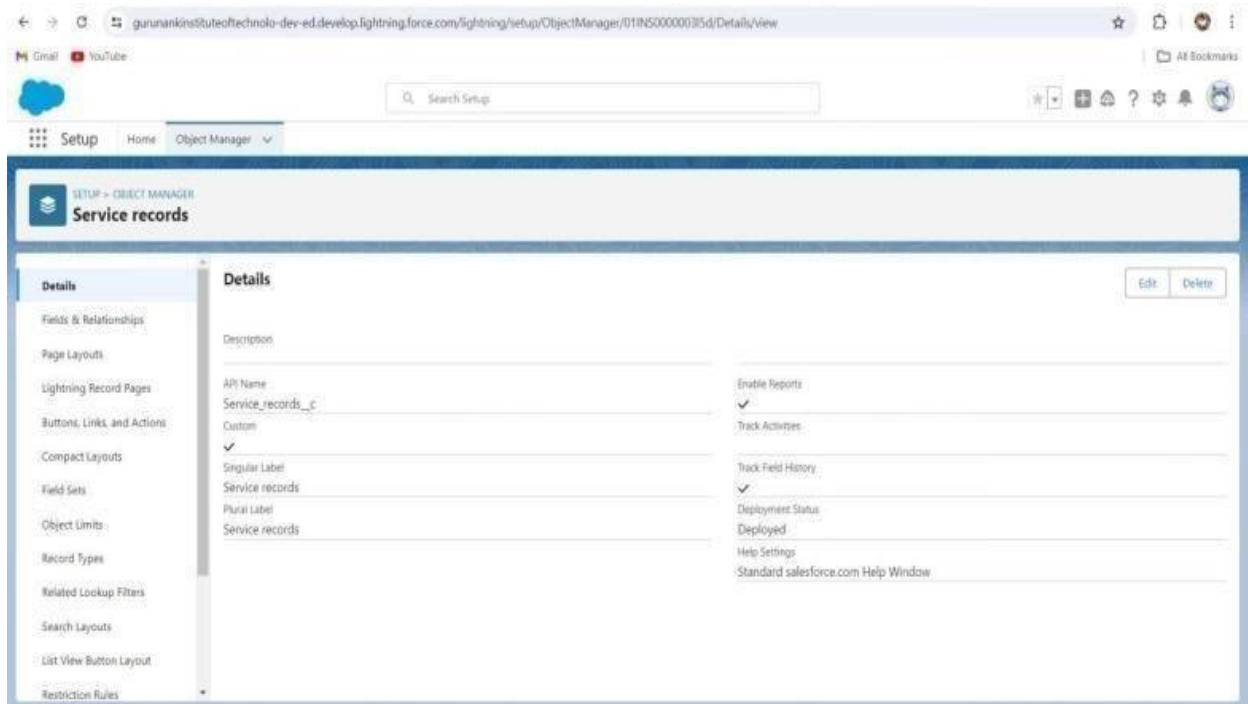

2. Plural label name >> Service records

3. Enter Record Name Label and Format

- Record Name >>Service records Name
- Data Type >> Auto Number
- Display Format >> ser-{000}
- Starting number >> 1 T

2. Click on Allow reports and Track Field History,

3. Allow search >> Save.

iv) Create Billing Details And Feedback ObjectTo

create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.

1. Enter the label name >> Billing details and feedback

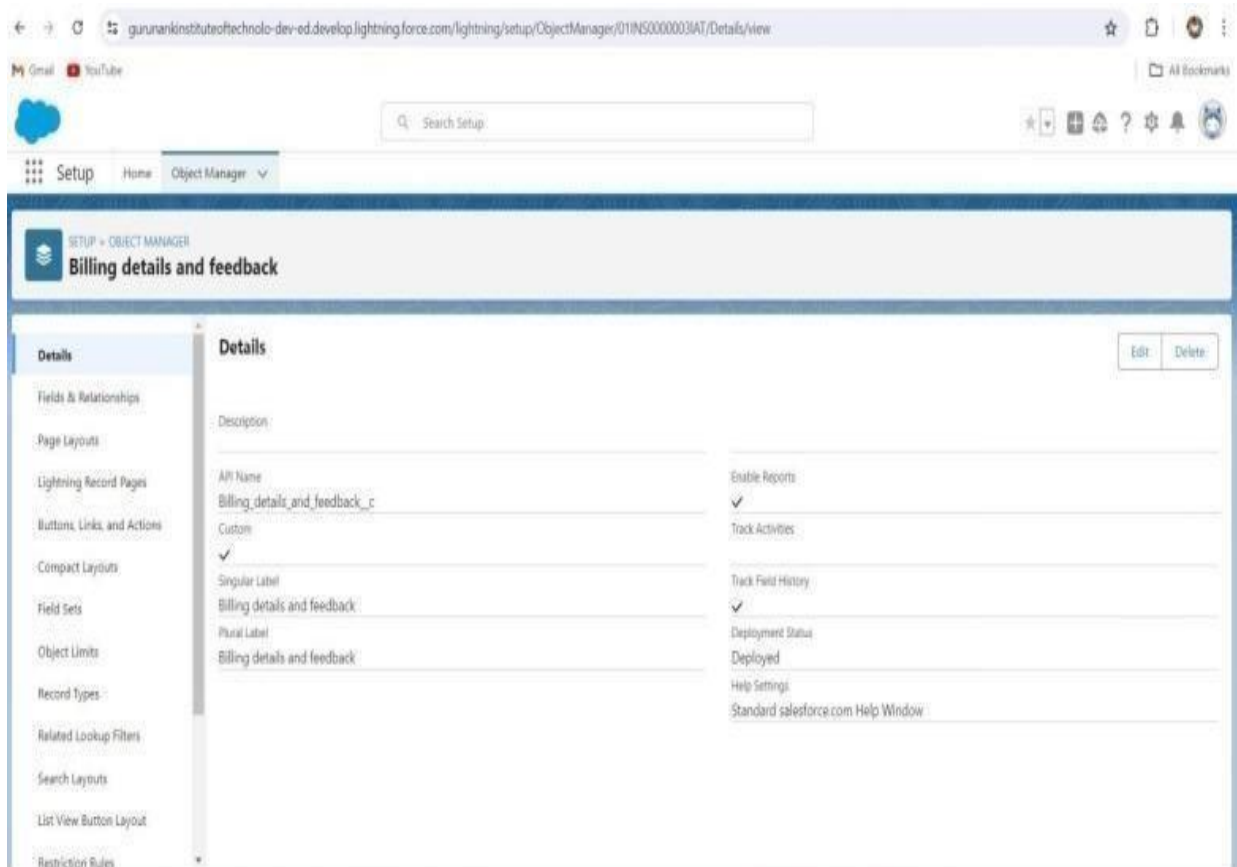

2. Plural label name >> Billing details and feedback

3. Enter Record Name Label and Format

- Record Name >> Billing details and feedback Name
- Data Type >> Auto Number
- Display Format >> bill-{000}
- Starting number >> 1

2. Click on Allow reports and Track Field History,

3. Allow search >> Save.

TASK 3: CREATE TABS

Creating A Custom Tab

To create a Tab:(Customer Details)

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)
2. Select Object (Customer Details) >> Select the tab style >> Next (Add to profiles page) keep it as default >> Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save .

New Custom Object Tab

Help for this Page

Next Cancel

To create a Tab:(Appointment)

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)
2. Select Object (Appointment) >> Select the tab style >> Next (Add to profiles page)
keep it as default >> Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save

To create a Tab:(Service Records)

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)
2. Select Object (Service Records) >> Select the tab style >> Next (Add to profiles page) keep it as default
>> Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save

To create a Tab:(Billing details and feedback)

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)
2. Select Object(Billing details and feedback) >> Select the tab style >> Next (Add to profiles page)keep it as default >> Next (Add to Custom App) uncheck the include tab .

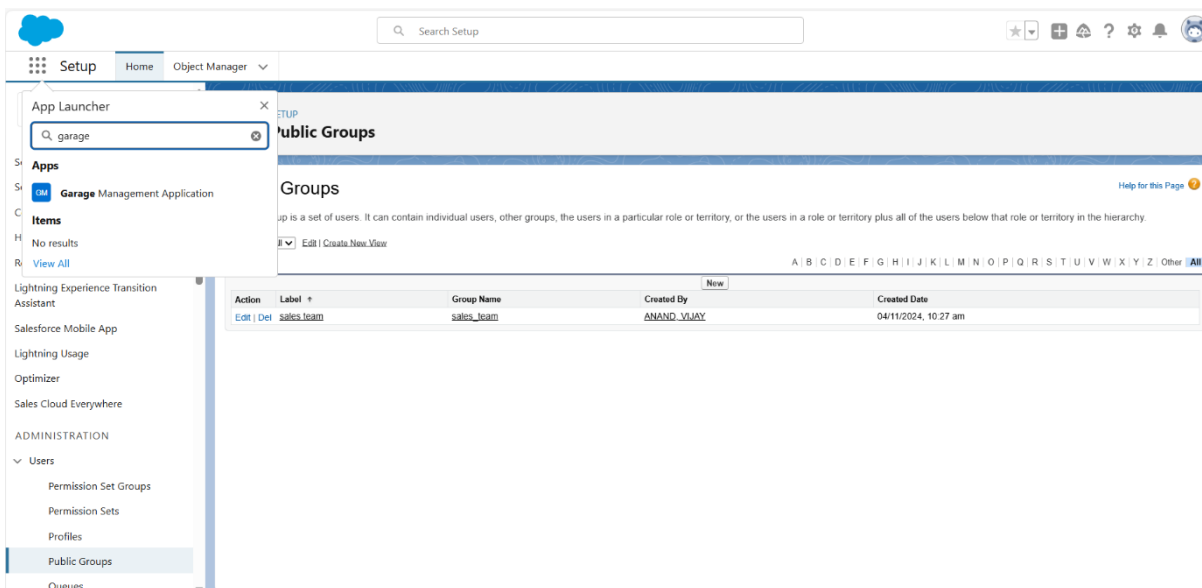

3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save

TASK 4: CREATE THE LIGHTNING APP

To create a lightning app page:

1. Go to setup page >> search "app manager" in quick find >> select "app manager" >> click on Newlightning App.
2. Fill the app name in app details as Garage Management Application >> Next >> (App option page)keep it as default >> Next >> (Utility Items) keep it as default >> Next.
3. To Add Navigation Items:
4. Select the items (Customer Details, Appointments, Service records, Billing details and feedback, Reports and Dashboards) from the search bar and move it using the arrow button >> Next.
5. To Add User Profiles:

Search profiles (System administrator) in the search bar >> click on the arrow button >> save & finish.

The screenshot shows the Salesforce Setup page. The left sidebar contains the navigation menu with 'App Launcher' selected. The main content area shows the 'Public Groups' page. A search bar at the top of the page contains the text 'garage'. Below the search bar, there is a table with the following data:

Action	Label	Group Name	Created By	Created Date
Edit Del	sales team	sales_team	ANAND VIJAY	04/11/2024, 10:27 am

TASK 5: CREATE THE FIELDS

1. To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Customer Details) in search bar >>click on the object.
2. Now click on "Fields & Relationships" >> New

3. Select Data Type as a “Phone”

4. Click on next.

5. Fill the Above as following:

- Field Label: Phone number
- Field Name : gets auto generated
- Click on Next >> Next >> Save and new.

Note: Follow the above steps for the remaining field for the same object.

2. To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Customer Details) in search bar >>click on the object.

2. Now click on “Fields & Relationships” >> New

3. Select Data type as a “Email” and Click on Next

4. Fill the Above as following:

- Field Label : Gmail
- Field Name : gets auto generated
- Click on Next >> Next >> Save and new.

Creation Of Lookup Fields

Creation of Lookup Field on Appointment Object :

1. Go to setup >> click on Object Manager >> type object name(Appointment) in the search bar >>click on the object.

2. Now click on “Fields & Relationships” >> New

3. Select “Look-up relationship” as data type and click Next.

4. Select the related object “ Customer Details” and click next.

5. Next >> Next >> Save.

Note: Make sure you complete Activity 4 Before continuing.

Creation of Lookup Field on Service records Object :

1. Go to setup >> click on Object Manager >> type object name(Service records) in search bar >>click on the object.

2. Now click on “Fields & Relationships” >> New

3. Select “Look-up relationship” as data type and click Next.

4. Select the related object “ Appointment ” and click next.

5. Make it a required field so click on Required.

6. Scroll down for Lookup Filter and click on Show filter settings.

7. Now add the filter criteria.

8. Field : Appointment: Appointment Date >> Operator : less than >> select field >> Appointment:Created Date
9. Filter type should be Required.
10. Error Message : Value does not match the criteria.
11. Enable the filter by click on Active.
12. Next >> Next >> Save.

Creation of Lookup Field on Billing details and feedback Object :1. Go to setup >> click on ObjectManager >> type object name (Billing details and feedback) in search bar >> click on the object.

2. Now click on “Fields & Relationships” >> New.
3. Select “Look-up relationship” as data type and click Next.
4. Select the related object “ Service records” and click next.
5. Next >> Next >> Save & new.

Creation Of Checkbox Fields

Creation of Checkbox Field on Appointment Object :

1. Go to setup >> click on Object Manager >> type object name (Appointment) in search bar >>click on the object.
2. Now click on “Fields & Relationships” >> New.
3. Select “Check box” as data type and click Next.
4. Give the Field Label : Maintenance service
5. Field Name : is auto populated
6. Default value : unchecked
7. Click on next >> next >> save.

Creation of Another Checkbox Field on Appointment Object :

1. Repeat the steps form 1 to 3.
2. Give the Field Label : Repairs
3. Field Name : is auto populated
4. Default value : unchecked
5. Click on next >> next >> save.
6. Follow the same and create another checkbox with given names
7. Give the Field Label : Replacement Parts
8. Field Name : is auto populated
9. Default value : unchecked
10. Click on next >> next >> save.

Creation of Checkbox Field on Service records Object :

1. Go to setup >> click on Object Manager >> type object name(Service records) in search bar >>click on the object.
2. Now click on “Fields & Relationships” >> New.
3. Select “Check box” as data type and click Next.
4. Give the Field Label : Quality Check Status
5. Field Name : is auto populated
6. Default value : unchecked
7. Click on next >> next >> save.

Creation Of Date Fields**Creation of Date Field on Appointment Object :**

1. Go to setup >> click on Object Manager >> type object name (Appointment) in the search bar >>click on the object.
2. Now click on “Fields & Relationships” >> New.
3. Select “Date” as data type and click Next.
4. Give the Field Label : Appointment Date
5. Field Name : is auto populated
6. Make it as a Required field by click on the Required option.
7. Click on next >> next >> save.

Creation Of Currency Fields**Creation of Currency Field on Appointment Object :**

1. Go to setup >> click on Object Manager >> type object name(Appointment) in the search bar >>click on the object.
2. Now click on “Fields & Relationships” >> New.
3. Select “Currency” as data type and click Next.
4. Give the Field Label : Service Amount
5. Field Name : is auto populated
6. Click on next
7. Give read only for all the profiles in field level security for profile.
8. Click on next > > save.

Creation of Currency Field on Billing details and feedback Object :

1. Follow the same steps as mentioned above in Billing details and feedback Object.
2. Change the label name as mentioned.

3. Give the Field Label : Payment Paid.
4. Field Name : is auto populated.

Creation Of Text Fields

1. Go to setup >> click on Object Manager >> type object name (Appointment) in the search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select "Text" as data type and click Next.
4. Give the Field Label : Vehicle number plate
5. Field Name : is auto populated
6. Length : 10
7. Make field as Required and Unique.
8. Click on next >> next >> save.

Creation of Text Fields in Billing details and feedback object :

1. Go to setup >> click on Object Manager >> type object name (Billing details and feedback) in search bar >> click on the object.
2. Now click on "Fields & Relationships" >> New.
3. Select "text" as data type and click Next.
4. Give the Field Label : Rating for service
5. Field Name : is auto populated
6. Length : 1
7. Make field as Required and Unique.
8. Click on next >> next >> save.

Creation Of Picklist Fields

Creation of Picklist Fields in Service records object :

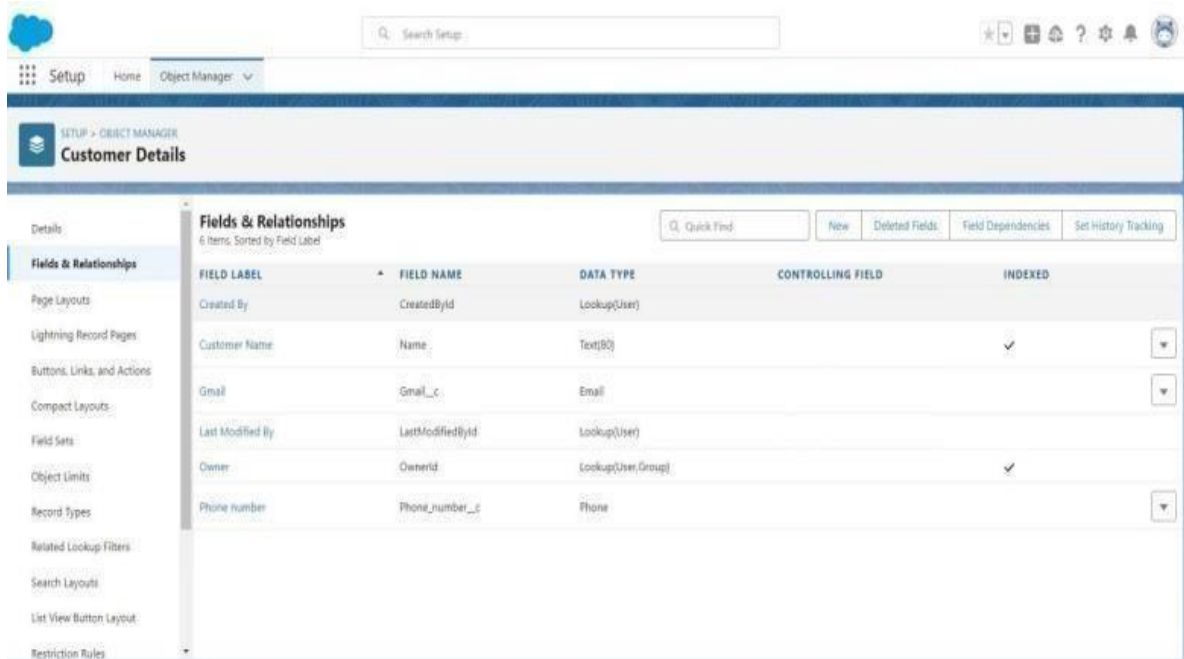

1. Go to setup >> click on Object Manager >> type object name (Service records) in search bar >> click on the object.
2. Click on fields & relationship >> click on New.
3. Select Data type as "Picklist" and click Next.
4. Enter Field Label as "Service Status", under values select "Enter values, with each value separated by a new line" and enter values as shown below.
5. The values are: Started, Completed
6. Click Next.
7. Next >> Next >> Save.

Creation of Picklist Fields in Billing details and feedback object :

1. Go to setup >> click on Object Manager >> type object name (Billing details and feedback) in search bar >> click on the object.
2. Click on fields & relationship >> click on New.
3. Select Data type as "Picklist" and click Next.
4. Enter Field Label as "Payment Status", under values select "Enter values, with each value separated by a new line" and enter values as shown below.
5. The values are: Pending, Completed.
6. Click Next.

Creating Formula Field In Service Records Object

1. Go to setup >> click on Object Manager >> type object name (Service records) in search bar >> click on the object.
2. Click on fields & relationship >> click on New.
3. Select Data type as "Formula" and click Next.
4. Give Field Label and Field Name as "service date" and select formula return type as "Date" and click next.
5. Insert field formula should be : CreatedDate
6. click "Check Syntax" .
7. Click next >> next >> Save.

The screenshot shows the Salesforce Setup interface for the 'Customer Details' object. The 'Fields & Relationships' section is active, displaying a table of fields. The table has columns for FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED. The fields listed are:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED

31. RecipientAddressList:

`{!$Record.Service_records__r.Appointment__r.Customer_Name__r.Gmail__c}`

32. Include subject as “ Thank You for Your Payment - Garage Management”.

33. Click done.

34. Click on save. Give the Flow label , Flow Api name will be auto populated. 35. And click save, and click on activate.

TESTING AND VALIDATION:

TASK 14: APEX TRIGGER

Apex Handler

Use Case : This use case works for Amount Distribution for each Service the customer selected for the Vehicle.

1. Login to the respective trailhead account and navigate to the gear icon in the top right corner.
2. Click on the Developer console. Now you will see a new console window.
3. In the toolbar, you can see FILE. Click on it and navigate to new and create New apex class.
4. Name the class as "AmountDistributionHandler".

```

1 public class AmountDistributionHandler {
2
3     public static void amountDist(list<Appointment__c> listApp){
4         list<Service_records__c> serlist = new list<Service_records__c>();
5
6         for(Appointment__c app : listApp){
7             if(app.Maintenance_service__c == true && app.Repairs__c == true && app.Replacement_Parts__c == true){
8                 app.Service_Amount__c = 10000;
9             }
10            else if(app.Maintenance_service__c == true && app.Repairs__c == true){
11                app.Service_Amount__c = 5000;
12            }
13            else if(app.Maintenance_service__c == true && app.Replacement_Parts__c == true){
14                app.Service_Amount__c = 8000;
15            }
16            else if(app.Repairs__c == true && app.Replacement_Parts__c == true){
17                app.Service_Amount__c = 7000;
18            }
19            else if(app.Maintenance_service__c == true){
20                app.Service_Amount__c = 2000;
21            }
22        }
23    }
24 }
  
```

```

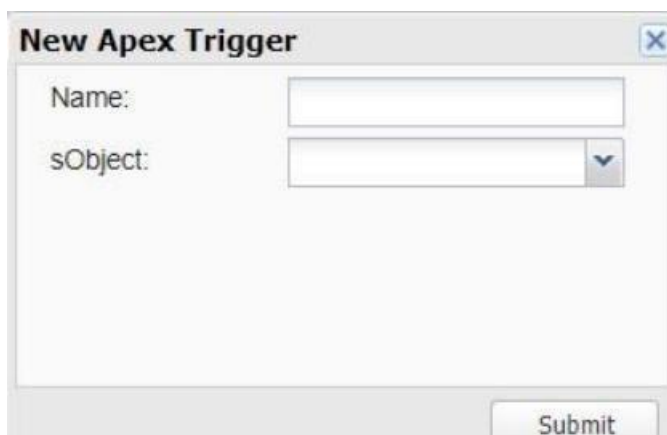

AmountDistribution.apex
AmountDistributionHandler.apex
Code Coverage: None API Version: 58
12 }
13 else if(app.Maintenance_service__c == true && app.Replacement_Parts__c == true){
14     app.Service_Amount__c = 8000;
15 }
16 else if(app.Repairs__c == true && app.Replacement_Parts__c == true){
17     app.Service_Amount__c = 7000;
18 }
19 else if(app.Maintenance_service__c == true){
20     app.Service_Amount__c = 2000;
21 }
22 else if(app.Repairs__c == true){
23     app.Service_Amount__c = 3000;
24 }
25 else if(app.Replacement_Parts__c == true){
26     app.Service_Amount__c = 5000;
27 }
28
29 }
30 }
31 }

```

Trigger Handler:

How to create a new trigger :

1. While still in the trailhead account, navigate to the gear icon in the top right corner.
2. Click on developer console and you will be navigated to a new console window.
3. Click on File menu in the tool bar, and click on new? Trigger.
4. Enter the trigger name and the object to be triggered.
5. Name : AmountDistribution
6. sObject : Appointment__c

The image shows a 'New Apex Trigger' dialog box with two input fields: 'Name:' and 'sObject:'. The 'Name:' field is empty, and the 'sObject:' field has a dropdown arrow. A 'Submit' button is located at the bottom right of the dialog.

Syntax For creating trigger :

The syntax for creating trigger is :

Trigger [trigger name] on [object name](Before/After event)

```

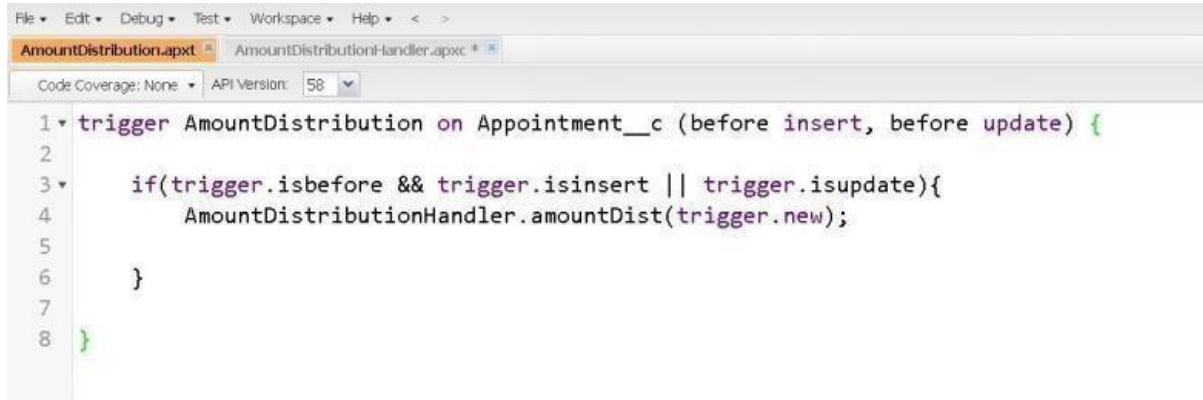

{
}

```

In this project, trigger is called whenever the particular records sum exceed the threshold i.e minimum

business requirement value. Then the code in the trigger will get executed.

1. Handler for the Appointment Object

```

1 trigger AmountDistribution on Appointment__c (before insert, before update) {
2
3     if(trigger.isbefore && trigger.isinsert || trigger.isupdate){
4         AmountDistributionHandler.amountDist(trigger.new);
5     }
6 }
7
8

```

KEY SCENARIOS ADDRESSED BY SALESFORCE IN THE IMPLEMENTATION PROJECT

TASK 15: REPORTS

Create A Report Folder

1. Click on the app launcher and search for reports.
2. Click on the report tab, click on new folder.
3. Give the Folder label as "Garage Management Folder", Folder unique name will be auto populated.

TASK 16: DASHBOARD

Create Dashboard Folder

1. Click on the app launcher and search for dashboard.
2. Click on dashboard tab.
3. Click new folder, give the folder label as " Service Rating dashboard".
4. Folder unique name will be auto populated.
5. Click save.
6. Follow the same steps, form milestone 15, and activity 2, and provide the sharing settings for the folder that just created.

Create Dashboard

1. Go to the app >> click on the Dashboards tabs.
2. Give a Name and select the folder that created, and click on create.
3. Select add component.
4. Select a Report and click on select.
5. Select the Line Chart. Change the theme.
6. Click Add then click on Save and then click on Done.
7. Preview is shown below.
8. After that Click on Subscribe on top right.
9. Set the Frequency as “ weekly ”.
10. Set a day as monday.
11. And Click on save.

The screenshot shows the Salesforce Customer review dashboard. The dashboard title is "Customer review" and it includes a "Refresh" button. Below the title, there is a warning message: "Last refreshed 2 days ago. Refresh this dashboard to see the latest data." The dashboard displays a "New Service Information Report" table with the following data:

Customer Name	Appointment Date	Service Status	Payment Paid
John	24/07/2024	Completed	
John	16/07/2024	Completed	Yes
John	16/07/2024	Completed	
John	16/07/2024	Completed	
John	24/07/2024	Completed	Yes
John	24/07/2024	Completed	
John	21/07/2024	Completed	

Below the table, there is a link to "View Report (New Service Information Report)".
